About Us

Trey Holdings Limited was established in 2018 and formally incorporated in 2020 by esteemed IT professionals in Port Moresby, Papua New Guinea. Our primary objective is to deliver superior Information and Communications Technology (ICT) products, custom software applications, and tech-driven business enablement services to corporate entities, public organizations, and community enterprises.

Our core technical expertise spans the entire spectrum of modern networks and digital architecture—encompassing the design, supply, installation, and configuration of wireless networks, LAN switches, WAN/VPN routing infrastructure, advanced IT security firewalls, structured cabling, and robust power protection systems (UPS).

In line with our commitment to digital transformation and local empowerment, Trey Holdings Limited has successfully expanded into custom platform development. This includes **CatalogKit** (www.catalogkit.org), our specialized mobile-first digital product catalog infrastructure built specifically to bridge the digital divide for PNG market vendors, informal traders, and micro-MSMEs. Alongside our primary ICT operations, we provide a reliable suite of auxiliary corporate services including architectural design and tender submissions, GPS vehicle tracking installations, office stationery supply, and comprehensive audio-visual event management solutions.

Corporate Vision & Mission

Our Vision

To be Papua New Guinea's leading provider of innovative, comprehensive, and digitally inclusive solutions across ICT, software application development, and technical project management—fostering sustainable economic growth and community empowerment.

Our Mission Statement

To deliver exceptional, scalable, and secure technical systems across ICT infrastructure, digital commerce applications, architectural design, and special project fields. We are committed to supplying high-quality products and field services that enhance operational capability, exceed client expectations, and create tangible long-term value for our commercial clients and grassroots community stakeholders alike.

Corporate Structure & Governance

Trey Holdings Limited maintains strict compliance with the rules and regulatory requirements of the Independent State of Papua New Guinea. The corporate leadership structure guarantees project accountability, financial oversight, and robust operational execution.

Mr. Mathew Tade

Managing Director & Shareholder

Oversees corporate strategy, regulatory compliance, and general business operations. Formally appointed as individual business owner and director since incorporation in June 2020.

Ms. Wilma Yurus

Application Development Lead & Project Contact

Directs the platform engineering unit, product deployment pipelines, and community outreach frameworks including the CatalogKit initiative and field agent training operations.

General Information & Statutory Registrations

Registered Entity Name	TREY HOLDINGS LIMITED
IPA Registration Number	1 - 126724 (Incorporated under the Companies Act 1997)
Tax Identification Number	501571704 (Internal Revenue Commission)
Year Established	2018
Year Incorporated	17 June 2020 (Re-registered 13 December 2024)
Core Focus Sectors	ICT Solutions, Custom Software Development, Office Supplies, Technical Procurement
Staff Complement	10 Full-time Professionals
In-house Languages	English, Pidgin (Tok Pisin)

Summary of Core Business Activities

- **Software & Custom Application Development:** Digital platform architectures, mobile-first web systems, and custom tools tailored for local PNG infrastructure restrictions (e.g., optimization for slow 3G data connection).
- **Enterprise ICT Infrastructure:** Corporate network designs, LAN/WAN setup, routing protocols, corporate data firewalls, security configurations, and structured building cabling.

- **Technical Hardware Procurement & Support:** Commercial supply, preventative maintenance, and repair of laptops, corporate servers, software operating licenses, business printers, and heavy-duty UPS back-ups.
- **Architectural & Engineering Submissions:** Comprehensive preparation of architectural design blueprints, layout schemas, and technical documentation packages for formal corporate and state project tenders.
- **GPS Fleet Tracking Systems:** Supply, technical terminal installation, and real-time monitoring dashboard configuration for asset security and enterprise vehicle management.
- **Event Management & Technical Production:** Full structural setup, logistical management, and professional audio/visual/lighting systems supply for corporate and public events.
- **Office Procurement Logistics:** High-volume commercial supply of corporate office stationery, administrative paper goods, custom printing services, and business materials.

Corporate Values

- **Quality Service & Technical Excellence:** Committing to data integrity, system reliability, and standard compliance across all hardware and software deployments.
- **Inclusivity & Community Enablement:** Designing technical solutions that explicitly include and benefit informal sectors and emerging micro-entrepreneurs.
- **Professionalism & Accountability:** Maintaining open communication channels, robust project updates, and transparent financial reporting systems.
- **Flexibility & Adaptability:** Modifying deployment configurations to thrive within challenging infrastructural, geographical, and connectivity landscapes.
